Subject: Response from studens, regading option to student of BAJMC Semester 4th related to may 2025 Examination .

Respected Sir/Madam,

We the students are seeking a clear clarification regarding the method that will be adopted for the preparation of the 4th Semester result Before acceptance of The Average marks formula cited in notice of 10june2025. It has been stated that average marks may be awarded in place of the subjects whose answer books were unavailable. However, students are concerned that the method of calculation should not result in their unfair failure. We request the university to ensure that no student is placed at a disadvantage due to circumstances beyond their control.

In addition, many students had already appeared in the practical examinations, and practical marks are being displayed on the university portal. Therefore, we seek a written clarification regarding whether the final result will be prepared on the basis of both **theory and practical marks together** or only on the basis of theory marks. We request that, wherever average marks are awarded, the calculation should take into account both the practical and theory components so that students receive a fair and

We further submit that the loss of answer books and the resulting decision to award average marks is entirely an administrative matter for which students are not responsible. Therefore, we strongly demand that no student should be declared failed as a consequence of the averaging process adopted by the University. Students must not suffer any academic loss, backlog, reappear, or failure due to circumstances arising from the University's own administrative shortcomings. We request the University to provide a written assurance that the method of awarding average marks will be implemented in a fair and student-friendly manner, ensuring that no student is adversely affected or declared failed because of this issue.

accurate result.

We further request the university to issue an official notification clearly explaining:

1. The formula and criteria for awarding average marks.
2. Whether practical marks will be included in the result calculation.

3. The measures being taken to ensure that students are not unfairly declared failed due to the loss of answer books or any administrative error.
4. The status of pending results, DMCs, and mark sheets.
5. The refund process for students who paid the reappear fee based on the incorrect notice.

We hope that the university will address these concerns promptly and provide a transparent and student-friendly resolution.

Thanking You.

Yours faithfully,

Students of BAJMC
Government P.G. College, Sector-9
